Wood Science and Technology

"Wood Science and Technology" is dealing with research contributions and reviews covering the entire field of wood and pulp. Among these subjects are wood anatomy and ultrastructure, all aspects of the biology of wood such as the cytology of cambium, xylem and phloem, tree physiology and the microbiological degradation of wood, the chemistry of wood and bark, and wood physics. Problems related to wood technology include combustion, drying, and impregnation of wood, its machining, gluing, and finishing, timber mechanics and rheology, and the conversion of wood into pulp.
Two copies of the manuscript should be submitted to the Editors, the Associate Editor, or the members of the Editorial Board.

Editors:

Prof. Dr. **H. Schulz,** Institut für Holzforschung der Universität München, Winzererstr. 45, W-8000 München 40, FRG
Prof. Dr. Dr. h.c. mult. **W. Liese,** Ordinariat für Holzbiologie der Universität Hamburg, Leuschnerstr. 91, W-2050 Hamburg 80, FRG
Prof. Dr. **T. E. Timell,** State University College of Environmental Science and Forestry, Syracuse, New York 13210, USA

Associate Editor:
K. A. Sorg

Assistant Editor:
Dr. **M. Stoll**

Copyright. Submission of a manuscript implies: that the work described has not been published before (except in the form of an abstract or as part of a published lecture, review, or thesis); that it is not under consideration for publication elsewhere; that its publication has been approved by all co-authors, if any, as well as by the responsible authorities at the institute where the work has been carried out; that, if and when the manuscript is accepted for pub- lication, the authors agree to automatic transfer of the copyright to the publisher; and that the manuscript will not be published elsewhere in any language without the consent of the copyright holders. All articles published in this journal are protected by copyright, which covers the exclusive rights to reproduce and distribute the article (e.g., as offprints), as well as all translation rights. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic data bases, video disks, etc., without first obtaining written permission from the publisher.
The use of general descriptive names, trade names, trademarks, etc., in this publication, even if not specifically identified, does not imply that these names are not protected by the relevant laws and regulations.
Special regulations for photocopies in the USA: Photocopies may be made for personal or in-house use beyond the limitations stipulated under Section 107 or 108 of U.S. Copyright Law, provided a fee is paid. This fee is US $ 0.20 per page per copy, plus a basic fee of US $ 2.00 per article. All fees should be paid to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA, stating the ISSN 0043-7719, the volume, and the first and last page numbers of each article copied. The copyright owner's consent does not include copying for general distribution, promotion, new works, or resale. In these cases, specific written permission must first be obtained from the publisher.
